

GUILHERME XAVIER

SOFTWARE ENGINEER

PROFESSIONAL RESUME

Senior Software Engineer with expertise in building high-performance distributed systems. Specialized in **Elixir/Phoenix** ecosystem with a proven track record of optimizing large-scale messaging platforms and financial applications. Strong advocate for test-driven development and scalable architecture design.

ESSENTIAL SKILLS

- Elixir
- Phoenix Framework
- PostgreSQL
- React.Js
- React Native
- Test Driven Development

CONTACT:

Address: Rua Joaquim Manoel, 134, Guanambi, Bahia, Brasil 46430-000

CERTIFICATIONS

- Advanced English
- Linux
- Android
- React Native

PROFESSIONAL HISTORY

Senior Software Engineer

Podium | November 2024- currently

- Worked on **GraphQL** API gateway serving thousands of daily requests
- Maintained real-time messaging infrastructure using **Phoenix/LiveView** and **OTP**
- Reduced processing latency through custom **Oban** schedulers and optimized Ecto queries
- Implemented property-based testing achieving better coverage across mission-critical services

Back-End Developer

Money Money Invest | August 2021- November 2024

- Engineered loan processing system handling million dollars in monthly transactions using **Elixir/Phoenix**
- Reduced application processing time through **API optimizations and caching strategies**
- Implemented **automated testing** suite reducing regression bugs
- Mentored 3 junior developers in Elixir best practices and functional programming concepts

Full Stack Developer

Micks Brasil | December 2020 - August 2021

- Developed **React Native** mobile app for internal users and published in app stores
- Reduced API response time through **Node.js** performance optimizations
- Automated legacy business processes saving hours of manual work weekly

EDUCATION

Instituto Federal Baiano

Systems Analysis and Development Degree | June 2019 - Currently

- Web and mobile development, Databases and Information Security are my strengths in the course.
